

More Ideas

1. Think about a credit monitoring service. These companies offer many levels of service. **Search for 'Credit Monitoring Services' to review your options.**
2. Make sure your logins and passwords are at least 10 digits. Reality check: **An 8 character password can be cracked in less than 4 days, a 10 character password will take over 6 years to crack.**
3. Pay for online purchases with your credit card, which has better guarantees under federal law than your online payment services or your debit card.
4. **Be alert! People are trying to trick you all the time.** Always verify that you're on a familiar Web site with security controls before entering personal data.
5. Monitor your bank and credit card statements.
